The Ukrainian Cosmetics Sector

Despite the Russian invasion that affected the Ukrainian economy, the cosmetics industry is still one of Ukraine's five most promising industries. Ukrainian cosmetics manufacturers continue to invest in the modernization of facilities, implementing sustainable practices, and entering new markets worldwide. In August 2024, new technical regulation based on EU Regulation No. 1223/2009 will come into force in Ukraine, which is a result of the long journey of implementation of European standards and the latest approaches for cosmetic safety. This step will open new export opportunities, minimize export barriers and put Ukraine on the EU map as an equal player.

Ukrainian Cosmetics Industry Facts:

- More than 300 manufacturers of cosmetics in Ukraine
- 40+ countries are importing cosmetics made in Ukraine
- Top 5 export destinations - Poland, Germany, Moldova, Kazakhstan, Uzbekistan
- New technical regulation based on EU Regulation 1223/2009 comes into force in August
- Manufacturers comply with ISO 22716 Quality System

The Association of Perfumery and Cosmetics of Ukraine (APCU) is a voluntary association of enterprises of the cosmetics market established in 2011. Our main aim is to solve professional issues at the national and international levels and provide consumers with effective and safe cosmetics. APCU closely cooperates with scientific institutions, as well as with state and local government bodies to increase the competitiveness of cosmetic products and promote the sustainable development of the industry as a whole. The international partnership of APCU with leading industry associations and organizations helps to introduce the latest cosmetics safety standards and provide timely and professional support in export and international cosmetics regulation to our members. Since 2021 we've started to organize national pavilions at worldwide exhibitions to promote our industry players on international levels.

Idea Shop | Mermade

MERMADA is a Ukrainian skincare brand based in Kyiv. Our flagship product is hydrogel eye patches, entirely manufactured in Ukraine from packaging to product.

We have curated a line of 5 patches with various effects: brightening dark circles, reducing puffiness, diminishing wrinkles, hydrating, and vitamin-infused quick action. We produce these patches under our brand and offer private label services.

Beyond patches our extensive product matrix, crafted by our team of technologists in our lab, includes daily essentials like lip balms, hand creams, and sanitizers, body care items such as body scrubs, aerosol foam body washes, lotions, and shower gels, facial care solutions like cleansers, moisturizers, face masks, and serums, hair care products including heat protectants, scalp exfoliants, shampoos, conditioners, and a perfume line.

Tube Plant Ukraine specializes in manufacturing tubes, utilizing advanced production techniques to ensure high-quality products.

With state-of-the-art machinery and a skilled workforce, the facility is dedicated to meeting diverse market demands for tubes used in various industries. Stringent quality control measures are implemented throughout the production process, guaranteeing reliable and efficient tube solutions for a wide range of applications.

In addition to prioritizing quality, the factory places a strong emphasis on environmental sustainability.

Implementing eco-friendly practices, waste reduction measures, and energy-efficient technologies contribute to the overall green footprint of the manufacturing process. This commitment aligns with the industry's growing awareness of environmental responsibility, making the factory a reliable partner for those seeking both quality and sustainability in tube manufacturing.

About Trade with Ukraine

Trade with Ukraine is a project co-funded by German Development Cooperation / giz (Deutsche Gesellschaft für internationale Zusammenarbeit GIZ GmbH). The project's goal is to support selected export-ready SMEs from Ukraine to enter the EU market. It supports SMEs from all government-controlled regions of Ukraine and different export sectors, being an immediate action in response to the war. The objective is to support the Ukrainian economy and to establish sustainable trade relations with the European Union. The project is implemented by sequa gGmbH, a German non-profit development organisation, specialized in private sector cooperation, chamber promotion, vocational training and trade promotion, in collaboration with different Ukrainian sector associations.
